Continuation of 10. Other: The examiner does not feel that using the word "positioned" would deem the claims allowable since positioned does not necessarily mean that the plates are not moved. In the Rogers reference, the plates are "positioned" at opposite ends of a bellows and they can't move from the respective ends of the bellows, so they are positioned in a fixed relationship with respect to each other, which would still render the claim rejected. The examiner notes the applicant's arguments about the plates not moving relative to one another. However, the fact that the applicant desires the plates not to move is not expressed in the claim language.
